

Dissertations and Theses Completed under Prof. Bažant's Advisorship, and Collaborators

June 22, 2021

1 Ph.D. Dissertations

1. Martin K. Christensen, *Field Solutions for Large Regular Frameworks under Initial Stress*, June 1973.
2. Leonard J. Najjar, *Environmental Factors and Prediction of Structural Effects in Creep of Concrete*, June 1973.
3. Spencer T. Wu, *Rate-Type Creep Law of Aging Concrete in Variable Environment*, August 1973.
4. Vicente Cuellar, *Rearrangement Measure Theory Applied to Dynamic Behavior of Sand*, August 1974 (co-advised with R.J. Krizek).
5. Mahjoub M. ElNimeiri, *Stability and Large Deflections of Curved Thin-Walled Girders*, June 1974.
6. Ibrahim Kutay Ozaydin, *A Micro-Mechanistic Analysis of Creep Response of Kaolin Clay*, June 1974 (co-advised with R.J. Krizek).
7. Ali A. Asghari, *Experimental and Numerical Investigation of the Effects of Variable Humidity, Aging and Stress Nonlinearity on Creep of Concrete*, August 1975.
8. Parameshwara D. Bhat, *Endochronic Theory of Inelasticity and Failure of Concrete with Application to Seismic-Type Cyclic Loading*, June 1976.
9. Elmamoun Abdalla Osman, *Prediction of Creep and Shrinkage of Concrete and Its Modeling as a Stochastic Process*, June 1976.
10. Atilla M. Ansal, *An Endochronic Constitutive Law for Normally Consolidated Cohesive Soils*, June 1977 (co-advised with R.J. Krizek).
11. John Louis Glazik, *Numerical Analysis of Elastodynamic Near-Tip Stress Fields for Stationary and Propagating Cracks*, June 1977 (co-advised with J.D. Achenbach).
12. Werapol Thonguthai, *Creep and High Temperature Effects on Pore Pressure and Drying of Concrete*, August 1977.
13. Rafael Blázquez, *Endochronic Model for Liquefaction of Sand Deposits as Inelastic Two-Phase Media*, June 1978 (co-advised with R.J. Krizek).
14. Ali A. El Zaroughi, *Application of Endochronic Constitutive Law to One-Dimensional Liquefaction of Sand*, June 1978 (co-advised with R.J. Krizek).
15. Sang-Sik Kim, *Theoretical and Experimental Investigation of Nonlinear Behavior and Creep of Concrete*, August 1978.
16. Liisa Panula, *Practical Prediction of Time-Dependent Deformations and Failure of Concrete*, August 1978.
17. Luis F. Estenssoro, *The Surface Singularity of Cracks*, August 1979.
18. Celal Sener, *An Endochronic Nonlinear Inelastic Constitutive Law for Cohesionless Soils Subjected to Dynamic Loads*, August 1979 (co-advised with R.J. Krizek).
19. Tatsuya Tsubaki, *Nonlinear Response of Plain Concrete and Cracked Reinforced Concrete*, August 1979.
20. Byung-Hwan Oh, *Mathematical Models for Inelastic Behavior and Cracking of Concrete Structures*, July 1982.
21. Jenn-Chuan Chern, *Creep Law of Concrete, Its Uncertainty and Effects of Drying and Cracking*, 1984.
22. Ta-Peng Chang, *Finite Element Modeling of Strain-Softening and Failure in Concrete*, 1985.
23. Jin-Keun Kim, *Fracture and Inelastic Constitutive Relations for Concrete and Geomaterials*,

1985.

24. Phillip A. Pfeiffer, *Size Effect in Blunt Fracture*, 1986.
25. Feng-Bao Lin, *Plasticity with Nonlocal Strain-Softening and Material Instabilities*, 1987.
26. Gilles Pijaudier Cabot, *Nonlocal Strain Softening Material Instabilities*, 1987.
27. Pere C. Prat, *Micromechanics Modeling and Fracture of Concrete and Geomaterials*, 1987.
28. Santosh Prasanna, *Nonlinear and Thermal Effects in Concrete Creep — Experiment and Theory*, 1989.
29. Mazen R. Tabbara, *Fracture and Stability of Strain-Softening Materials and Structures*, 1990.
30. Joong-Koo Kim, *Prediction of Time-Dependent Deformations of Concrete and Bridge Deflection Probability*, 1990.
31. Mohammed T. Kazemi, *Fracture Characteristics of Quasi-brittle Materials from the Size Effect Method and Implications in Design*, 1990.
32. Yunping Xi, *Analysis of Concrete Creep, Shrinkage and Fracture by Deterministic and Probabilistic Methods*, 1991.
33. Ravindra Gettu, *Concrete and Rock Fracture and the Influence of Loading Rate*, 1992.
34. Milan Jirásek, *Modeling of Fracture and Damage in Quasibrittle Materials*, 1993.
36. Zhengzhi Li, *Fracture Size Effect and Damage Properties of Quasibrittle Materials*, 1995.
37. Yuyin Xiang, *Modeling of Fracture and Scaling in Quasi-Brittle Materials*, 1996.
38. Sandeep Baweja, *Long-Term Deformations of Concrete, Practical Prediction, Effect of Composition and Mechanisms*, 1996.
39. Sanjeev Tandon, *Fracture Behavior of Quasi-Brittle Material*, 1997 (co-advised with K.T. Faber).
40. Jang-Jay Ho Kim, *Failure Mechanisms and Size Effect of Quasi-Brittle Materials: Ice, Steel Reinforced Concrete and Fiber Composite*, 1998.
41. Michele Brocca, *Material Modeling and Structural Analysis with the Microplane Constitutive Model*, 1999.
42. Ferhun C. Caner, *Computational Modeling of Damage and Fracture in Concrete*, 2000.
43. Emilie Becq-Giraudon, *Size Effect on Fracture and Ductility of Concrete and Fiber Composites*, 2000.
44. Goangseup Zi, *Size Effect of Quasibrittle Materials and Simulation of Concrete Decontamination Using Microwave Heating*, 2002.
45. Zaoyang Guo, *Size Effect Analysis of Materials and Structures from Micro Scale to Macro Scale*, 2004.
46. Yong Zhou, *Size Effect on Strength of Fiber Composites and Rigid Foams*, 2005.
47. Alessandro Beghini, *Stability and Quasibrittle Failure of Fibrous and Particulate Composites*, 2005.
48. Sze-Dai Pang, *Probabilistic Size Effect in Fracture of Quasibrittle Materials*, 2005.
49. Martin G. Andrews, *The Static and Dynamic Interaction of Multiple Delaminations in Plates Subject to Cylindrical Bending* (co-advised, principal advisor: Prof. Roberta Massabó, Univ. of Genova), 2005.
50. Qiang Yu, *Size Effect and Design Safety in Concrete Structures under Shear*, 2007.
51. Jia-Liang Le, *Probabilistic and Energetic Scaling of Fracture of Quasibrittle Materials*, 2010.
52. Mahendra Gattu, *Structural Strength at Large Strains under Softening Compression Damage*, Aug. 2012.
53. Christian G. Hoover, *Fracture and size effect in quasibrittle composites: Experiment and theory*, Aug. 2012.
54. Kyung-Tae Kim, *Scaling of Failure and Time Dependent Behavior of Brittle Heterogeneous Materials: Composite, Concrete and Bone*, Sept. 2012.
55. Mija Helena Huber, *Improved Prediction Models of Creep, Shrinkage, and Relaxation of Modern Concretes*, Aug. 2013.
56. Mohammed Gallal Alnaggar, *Multiscale modeling of aging and deterioration of reinforced concrete structures* (as co-advisor with principal advisor Prof. Gianluca Cusatis), Apr. 2014.
57. Kedar S. Kirane, *Fatigue, fracture and size effect in particulate and fabric composites: Constitutive modeling, theory and experiments*, Dec. 2014.

58. Viet Tuan Chau, *Fracture Mechanics in Anisotropic Quasi-brittle Material: Hydraulic Fractures in Shale, Damaging Composites*, June 2017.

59. Saeed Rahimi-Aghdam, *Long-Term Deformation and Failure of Concrete and Shale Structures*, March 2019.

60. Mohammad Rassolinejad, *Failure, Fracture and Long-Term Deformations of Concrete and Other Quasibrittle Materials*, Aug. 2019.

61. Wen Luo, *Fishnet Statistics for the Strength Distribution of Nacre-like Biomimetic and Architected Quasibrittle Materials*. April 30, 2020.

2 M.S. Theses

1. Leonard J. Najjar, *The Drying of Concrete as a Nonlinear Diffusion Problem*, June 1971.

2. Werner Astl, *Torsion of Stiffening Systems of Thin-Walled Beams in High-rise Structures*, June 1976.

3. Michael C. Burrow, *Nonlinear Three-dimensional Finite Element Analysis of Reinforced Concrete Beams in Flexure*, August 1977.

4. Chuan Lin, *Frictional Limit Design of Reinforcement in Plates*, August 1981.

5. Steven Zebich, *Statistical Analysis of Creep and Shrinkage Data*, December 1981.

6. James S. Ong, *Creep in Continuous Beam Built Span by Span*, February 1982.

7. Warren J. Raftshol, *Finite Element Model for Creep and Shrinkage in Concrete Cylinders*, August 1982.

8. Kwang-Liang Liu, *Uncertainty Analysis and Shrinkage in Concrete Structures*, 1984.

9. Manuel Aguinaga-Zapata, *Effect of Creep on Overloads of Slab Buildings During Construction*, 1985.

10. Sohail Aslam, *Bayesian Probabilistic Prediction of Creep Deflections of Bridges*, 1985.

11. Hsu-Huei Sun, *Size Effect in Diagonal Shear Failure and Pullout Strength of Concrete*, 1986.

12. Hung-Wen Chen, *The Effect of Drying Creep in Concrete Box Girder Beams*, 1986.

13. Stephen Beissel, *Numerical Analysis of Non-*

linear and Time-Dependent Fracture by Means of the Smear-Tip Superposition Method, 1990.

14. William F. Schell, *Fatigue Fracture of High Strength Concrete Under High Frequency Loading*, 1991.

15. Gustavo Gioia, *Is No-Tension Dam Design Always Safe?—A Comparison with Fracture Mechanics Analysis*, 1994.

16. Louis Paul Goncalves Da Costa, *Numerical Simulation of a Concrete Slab Impacted by a Projectile Using Microplane Theory and Finite Elements*, 1995.

17. Michele Cyr, *Fracturing Truss Model: Size Effect of Reinforced Concrete Beams in Torsion*, 1998.

18. Guang-Hua Li, *Unbiased Statistical Evaluation of Creep and Shrinkage Models from a Comprehensive Database*, 2009.

Appendix I: Doctoral Theses Prepared Fully or Partly under Bažants Advisorship or Co-Advisorship at Northwestern, but Defended at Other Universities

1. Abu-Bakr Wahab *Stability of parallel crack system* (visiting, from U. of Khartoum).

2. Anping Hong, *Theory of Crack Initiation from Smooth Surfaces and Its Applications*, (co-advised with H. Binienda), 1994—Ph.D. awarded by University of Akron with Bažant as examining committee member.

3. Rodrigue Desmorat, *Size effect in fiber of bar pullout with interface softening slip*, Ph.D. Thesis, L.M.T., E.N.S. (Ecole National Supérieur) de Cachan, Paris-Cachan, France, 1992-93 (princ. advisor Jean Lemaitre); Visiting Research Assistant at Northwestern University.

4. Laurent Granger, *Effect of Composition on Basic Creep of Concrete and Cement Paste*, Ph.D. Thesis, E.C.P.C. (Ecole Nationale des Ponts et Chaussée), Paris, France, 1993 (princ. advisor Paul Acker); Visiting Research Assistant at Northwestern University.

5. Anders Boe Hauggaard, *Microprestress-Solidification Theory for Concrete Creep*, Ph.D. Thesis 1996, Technical University of Denmark, Lyngby, 1995 (prepared mainly at NU, supported by 6 month Danish Fellowship).

6. Jiří Nemeček, *Microplane modeling of concrete*, part of Ph.D. dissertation at CTU Prague (principal advisor Z. Bittnar).

7. Alexander Steffens, *Mathematical Model for Aggregate-Silica Reaction in Concrete*. Part of Ph.D. Thesis, T.U. Braunschweig, Germany 1999 (6 months at NU during 1998).

8. Gianluca Cusatis, *Microstructure Based Lattice*

Model for Concrete, PhD. Thesis 2002, Politecnico di Milano, Italy (1 year at NU, 1999–2000, supported by Italian fellowship).

9. Giovanni de Luzio, *Nonlocal Microplane Model for Concrete* PhD. Thesis 2003, Politecnico di Milano, Italy (1 year at NU, 2000–2001, supported by Italian Fellowship).

10. Martin Wierer, *Computational Modeling of Composites* Predoctoral Fellow (doctoral student at CTU Prague, principal advisor J. Šejnoha), 4 months in 2003.

11. Miroslav Vořechovský, *Stochastic fracture mechanics and size effect* (doctoral student at VUT Brno), Fulbright Fellow, 8 months in 2003–04 (with supplement from Bažant’s NSF grant).

12. Jan Eliáš, Dissertation on Stochastic Modeling of Damage and fracturing in Concrete, one year 2013–2014 at NU, defended at TU Brno, Czech Rep.

13. Cumbao Li, *Spherocylindrical microplane model for shale* (Nov. 2015 - Sept. 2017). Doctoral student; dissertation submitted to Sichuan University, Chengdu, China.

14. Abdullah Dönmez, prepared dissertation defended at Istanbul Technical University, on Size effect in punching shear and Interaction of drying and autogenous shrinkage, Supported from Turkey, at NU Apr. 2014–May 2015.

15. Cumbao Li, Sichuan University, Chengdu, supported from China (at NU Nov. 2015 - Sept. 2017). PhD in China in November 2017.

Appendix II: Other Theses Prepared Fully or to a Major Extent under Bažant’s Advisorship at Northwestern but Defended at Other Universities

1. Abu Bakr Wahab (PhD student from University of Khartoum, Sudan, *Stability of parallel crack system in concrete*, 1979.

2. M. Elisabeth (Betsy) Karr (M.S. Student on NU Summer Institute Fellowship), *Size effect in high strength concrete*, 1989.

3. Jérôme Pelan, *Inelastic buckling study of concrete columns*, Graduation Thesis at Ecole polytechnique, Paris–Palaiseau, France, Visiting Fellow at Northwestern University, spring 1992.

4. Marc Heitz, *A study of quasibrittle fracture*, Graduation Thesis at Ecole polytechnique, Paris–Palaiseau, France, Visiting Fellow at Northwestern university, spring 1992.

5. Phillipe Hein, *Finite element whose distribution function has an excess number of parameters determined by optimum fitting*. Graduation Thesis at Ecole polytechnique, Paris–Palaiseau, France, Visiting Fellow at Northwestern University, spring 1993.

6. Michael Thoma, *Size effect in pullout failure of fibers or reinforcing bars*, Diploma Thesis (Diplomar-

beit, Lehrstuhl A für Mechanik), Technische Universität München, Germany; Visiting Research Assistant at Northwestern University, Dec. 1992–June 1993.

7. Olivier Barrère, *Fatigue fracture and size effect in fibre-reinforced concrete*, Thesis, E.N.S. de Cachan, France, 1996.

8. Louis da Costa, *Numerical simulation of impact on concrete walls*. Visiting Fellow (3 months at NU), from Ecole centrale, France, 1996.

9. Frédéric Beltoise. *Modeling of rapid heating of concrete wall*, princ. advisor for Ph.D. G. Pijaudier-Cabot, E.N.S. de Cachan, France, Visiting Fellow at NU, summer 1997.

10. Gianluca Cusatis (particle model for concrete with interface damage and fracturing, and extension of microprestress-solidification theory to variable temperature), princ. advisor Luigi Cedolin, dissertation defended at Politecnico di Milano, 1-year 1999–2000 under grant from Italy.

11. Andreas Kalkbrenner, Predoctoral Fellow, graduate student on leave from Stuttgart University (Prof. H. Reinhardt), Visiting Fellow, Oct. 2001 - Jan. 2002.

12. Olivier Gouirand, Graduation Thesis at Ecole polytechnique, Paris–Palaiseau, France, Visiting Fellow, April–July 2004, Study of microplane model for fiber-reinforced concrete (support from France, plus supplement from Bažant’s project).

13. Olivier Abellan, Graduation Thesis at Ecole polytechnique, Paris–Palaiseau, France, Visiting Fellow, Approximations of aging coefficient for concrete creep, April–July 2005.

14. Pierre Madelpech, Graduation Thesis at Ecole polytechnique, Paris–Palaiseau, France, Visiting Fellow, Computer modeling of skin wrinkling in sandwich plates, April–July 2005.

15. Mathieu Verdure, Graduation Thesis at Ecole polytechnique, Paris–Palaiseau, France, Visiting Fellow, One-dimensional model for progressive collapse of tall buildings, April–July 2006.

16. Marc de Maréchal, Graduation Thesis at Ecole polytechnique, Paris–Palaiseau, France, Visiting Fellow, Size effect in punching shear of reinforced concrete slabs, April–July 2007.

17. Gianluca Cusatis, PhD Thesis on discrete concrete fracture model, Politecnico di Milano, 2001.

18. Ahmet Abdullah Dönmez, PhD Thesis on extrapolation of concrete creep and shrinkage, Istanbul Technical University 2018.

Appendix III: Theses at Other Universities Advised or Co-Advised by Bažant During His Visiting Appointments at These Universities

1. M. A. Mukaddam, *Creep analysis of concrete structures at elevated temperatures*, Ph.D. Dissertation, University of California, Berkeley, Ph.D., 1968 (princ. advisor Boris Bresler).
2. B.M. Jensen, *The effect of temperature on the thermal dilatation of concrete conditioned to a given humidity*, M.S. Thesis, 1968, University of California, Berkeley, 1968 (princ. advisor Boris Bresler).
3. Jan Byfors, *Concrete creep at early ages*, CBI, Royal Institute of Technology, Stockholm, Sweden, 1977 (co-advisor).
4. L. Resende, *Progressive damage continuum model for rock*, Ph.D. Dissertation, University of Cape Town, South Africa, 1984 (princ. advisor John B. Martin).
5. Jan Erik Jonasson, *Concrete Durability*, Ph.D., Lulea University, Sweden 1994 (also, principal examiner).

Appendix IV. Postdoctoral Associates and Visiting Scholars Supported Fully or Partly from Bažant's Projects

1. Geir Horrigmoe, Trondheim U.
2. Hideomi Ohtsubo (co-advisor: S. Nemat-Nasser)
3. Abu Bakr Wahab, Univ. of Khartoum, Sudan
4. R.P. Khetan (with Prof. Achenbach), India
5. Atila Ansal, Bosphorus University, Istanbul
6. Luigi Cedolin, Politecnico di Milano
7. Pietro Gambarova, Politecnico di Milano
8. Zekai Celep, TU Istanbul
9. Henrik O. Madsen, Danish Eng. Acad., Lyngby
10. Tong-Sheng Wang, Anhui, China
11. David Darwin, U. of Kansas
12. Andrej Pitoňák, ÚSTARCH, Slov. Ac. Sci. Bratislava
13. Alexander Zubelewicz, IPPT, Warsaw
14. Michael P. Wnuk, South Dakota State U.
15. Soo-Gon Lee, Korea
16. Patrick Droz, EFFL, Lausanne
17. Jacky Mazars, ENS de Cachan, Paris
18. Yves Berthaud, ENS de Cachan, Paris
19. Joško Ožbolt, Stuttgart U. and Zagreb U.
20. Jianying Pan, China Acad. of Railway Sci., Beijing
21. Jose More Ramos, Lab. Nat. Engeh. Civil, Lisbon
22. Mehmet Basar Çivelek, on leave from IIT Chicago
23. Siddik Sener, Gazi U., Ankara
24. Kang-Ming Xu, Wuhan Inst. Hydr.Elec.Engrg.
25. Zhiping Cao, Yellow River Cons.Com., Zheng-Zhou
26. Y.W. Kwon, postdoc, prof. in Korea
27. Toshiaki Hasegawa, Shimizu Co., Tokyo
28. M. Elisabeth (Betsy) Karr
29. Ignacio Carol, UPC, Barcelona
30. Jaime Planas, UP Madrid
31. Vladimír Krístek, CTU Prague
32. Rodrigue Desmorat, ENS de Cachan, Paris
33. Anders Boe Hauggaard, U. of Denmark, Lyngby
34. Pere C. Prat, postdoc, from UPC Barcelona
35. Jaroslav Navrátil, TU Brno, Czech Rep.
36. Richard Kohoutek, Univ. of Wollongong, Australia
37. Jiří Němeček, CTU Prague
38. Borek Patzák, CTU Prague
39. Jérôme Pelan, EP, Paris-Palaiseau
40. Marc Heitz, EP, Paris-Palaiseau
41. Jan L. Vitek, CTU Prague
42. Stuart G. Reid, U. of Sydney
43. Larissa Molina, CBI, Stockholm
44. B. Pohl, EP, Paris-Palaiseau
45. Phillipe Hein, EP, Paris-Palaiseau
46. Michael Thoma, TU Munich, Germany
47. Olivier Barrère, EP, Paris-Palaiseau
48. Louis da Costa, EP, Paris-Palaiseau
49. Frédéric Beltoise, EP, Paris-Palaiseau
50. M. Verdure, EP, Paris-Palaiseau
51. Shang-Ping Bai, Inst. of Sci. & Technol., Shanxi
52. Min Chen, Water Conservancy Hydroel.Power Res.
53. Imre Bojtár, TU Budapest
54. Zhishen Wu, Kyoto University (later Nanjing)
55. Laurent P. Granger, EDF, France
56. Xiao-Xin Cui, Beijing Polytechnic Inst.
57. Peter J. Simeovov, Bulgarian Acad. Sci., Sophia
58. E. A. El Traify, Univ. of Khartoum, Sudan
59. Wei Yi Gan, Northw. Invest./Design Inst., Xi'an
60. Christian Huet, Ecole des Ponts et Chaussees, Paris
61. Milan Holický, Klokner Inst., CTU (ČVUT), Prague
62. Yuan-Neng Li, China
63. An-Ping Hong, China
64. Wei-Hwa Gu (co-advisor K. Faber)
65. Bořek Patzák, CTU, Prague
66. Franz-Josef Ulm, LCPC, Paris
67. Alexander Steffens, Stuttgart University
68. Gianluca Cusatis, Politecnico di Milano
69. Giovanni de Luzio, Politecnico di Milano
70. Jan Červenka, Červenka Co., Prague
71. Petr Kabele, CTU, Prague
72. Drahomír Novák, TU Brno, Czech Rep.
73. Daniele Ferretti, U. of Parma, Italy
74. Jan Sládek, Slovak Academy of Sciences, Bratislava
75. Reza Vaziri, UBC, Vancouver
76. Libor Jendele, Červenka Co., Prague
77. Martin Wierer, CTU Prague
78. Miroslav Vořechovský, TU Brno, Czech Rep.
79. Arash Yavari, Caltech (as external collaborator)
80. Petr Pařík, Czech Acad. Sci. Prague
81. Ferhun Caner, UPC, Barcelona
82. Peter Grassl, Chalmers U., Göteborg, Sweden
83. Vít Šmilauer, CTU Prague
84. Goangseup Zi, Korea University, Seoul
85. Yun Lee, KAIST, Korea
86. Jian-Ying Wu, from Zhejiang Univ., Hangzhou, China
87. Jan Eliáš, TU Brno, Czech Rep.
88. Jörg Unger, BAM, Berlin
89. Vanja Travaš, U. of Zagreb, Croatia
90. Roman Wendner, BOKU, Vienna

91. Jan Vorel, CTU, Prague
92. Weihui Duan, Monash University, Melbourne
93. Xin Chen, Univ. of Mining & Technology, Beijing
94. An Duan, Zhejiang University, Hangzhou, China
95. Petr Havlásek, Czech Technical University in Prague
96. K Darunkumar Singh, IIT Guwahati, Assam, India
97. Matthieu Vandamme, Université Paris Est
98. Abdullah Dönmez, Istanbul Techn. University, Turkey (Vis. Fellow, 2014-15)
99. Yewang Su, Tsinghua U. and National Academy of Sciences, Beijing
100. Enrico Masoero, Univ. of Newcastle, U.K.
101. Kedar Kirane, Exxon Corp., Houston, TX
102. Zaoyang Guo, Prof., Beihang University, Beijing, China
103. Miguel Bessa, in collab. with W-K Liu
104. Mohammad Javad Abdolhosseini Qomi, Univ. of California, Irvine
105. Marco Salviato (Univ. di Padova, Jan. 2013 - Aug. 2015, became Assist. Prof. U. of Washington, Seattle, Aero Dept.)
106. Hoang Nguyen, Saigon (Ho Chi Min City), Vietnam-US Foundation (Vis. Fellow, later Bažant's PhD student)
107. Cunbao Li, Sichuan University, Chengdu, China (Nov. 2015 - Sept. 2017)
108. Huyjin Lee, Grad. Res. Assistant (2016-2018, from Korea University)
109. Weixin Li, postdoc, after a PhD at NU under Prof. Cusatis' advisorship
110. Abdullah Dönmez, Istanbul Techn. University, Turkey (Vis. Scholar, 2019-2020)

Appendix V. Visiting Professors (supported partly or fully on ZPB grants)

- Jaime Planas, Professor on leave from Universidad Politecnica de Madrid, 1994 to write a joint book)
- Milan Jirásek (Eschbach Prof.), Professor on leave from CTU Prague, 2011 (to write a joint book)
- Ferhun Caner, Professor on leave from UPC Barcelona, summers 2011, 2012, 2013, 2014 (to work on quasibrittle constitutive models)
- Goangseup Zi, Professor on leave from Korea University, summer 2013 (to work on microplane constitutive model)

Technicians (paid from grants, since 1969):

John Schmidt, Samuel Meiri, Marvin Hagen, Steve Albertson, John Chirayil, John Bayldon (previously at CTU Prague: M. Kounovská, 1963-67, at U. of Toronto: E. Ezra, 1967)
